DETAILED ACTION

Response to Amendment

1. This application is a 371 of PCT/EP2003/000967.
2. Claims 1-16 are pending as amended July 1, 2004.

Priority

3. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

4. The information disclosure statement (IDS) submitted on July 1, 2004, has been considered by the Examiner.

Specification

5. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: METHOD FOR PRODUCING MULTI-LAYER COATING CURABLE BY THERMALLY AND WITH ACTINIC RADIATION.

Claim Rejections - 35 USC § 112

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A. Independent claim 1 is indefinite because it is apparently contradictory. Step (III) recites: "...applying at least one pigmented coating material (B) curable thermally and/or at least one pigmented coating material (B) curable thermally and with actinic radiation..." which appears to require that a thermally curable material and/or a thermally curable and an actinically curable material be applied. Such a recitation allows for only a thermally curable material to be applied. Nevertheless, step (IV) recites "...exposing the at least one pigmented film (B) curable thermally and with actinic radiation to actinic radiation to give at least one partially cured film (B) which can still be thermally cured..." which appears to *require* that a thermally curable and actinically curable material be applied. A similar situation exists for coating (C) in steps (V) and (VI). Consequently, the metes and bounds of the claims are impossible to determine.

Allowable Subject Matter

8. Claim 1 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
9. The following is a statement of reasons for the indication of allowable subject matter: While dual cure coating materials and their use in multi-layer coating are known in the art, as evidenced by numerous references in Applicant's IDS, the prior art neither teaches nor suggests the claimed process in which a subsequent layer is applied atop a previous layer that has been partially cured by actinic radiation, and finally jointly thermally curing all applied layers.

Conclusion

10. The prompt development of clear issues in the prosecution history requires that applicant's reply to this Office action be fully responsive (MPEP § 714.02). When filing an amendment, applicant should specifically point out the support for any amendment made to the disclosure, including new or amended claims (MPEP §§ 714.02 & 2163). A fully responsive reply to this Office action, if it includes new or amended claims, must therefore include an explicit citation (i.e., page number and line number) of that/those portion(s) of the original disclosure which applicant contends support(s) the new or amended limitation(s).
